January 24, 2013

I have had representation for numerous years in print and on the Internet. I was becoming disappointed with a leading competitor when I recently met with my Valley Yellow Pages' Account Executive. He was thorough and took a strong interest in my business and goals. We came up with a larger advertising program that I am very pleased with. My ad is well designed and positioned aggressively.

As a family owned and operated business, customer service and the quality of my work are very important to me. I am looking forward to Valley Yellow Pages helping increase my business by showing all the services I provide through myyp.com, print and the free mobile phone application to my potential clients. I am glad I found a company that takes my business growth seriously.
